TOPIC OF THE DAY STBBI Testing

AUTHOR Mariana Echeverri

DATE April 12, 2023

THE REASON WHY

We wanted to learn about the different ways of testing for Sexually Transmitted and Blood Borne Infections (STBBI's)

HOW WE DID IT

Dr. Megan Sorokopud-Jones shared a presentation about STBBI testing and Enrique demonstrated HIV self-testing

WHAT WE LEARNED

We learned that STBBI testing is super important because without it people can't be treated. We also learned that we can identify other risks of infections by testing. Often there are multiple ways of testing for each infection but it's always important to double check and confirm the results with a lab-based testing

THE FACILITATOR

Dr. Megan Sorokopud-Jones

THE EXPERIENCE

National Collaborating Centre
for Infectious Diseases
Centre de collaboration nationale
des maladies infectieuses
